

IT/Informatics

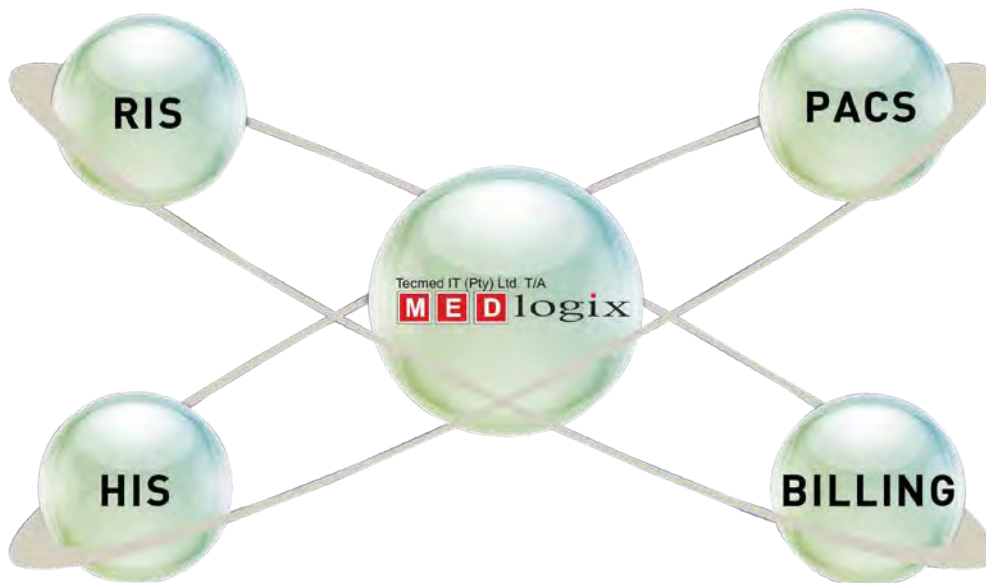

“ Education is the most powerful weapon you can use to change the world. ”

– Nelson Mandela

IT/Informatics

Tecmed Information Technology / Informatics provides the digital backbone which is required in the public or private sector in the departments of Radiology, Oncology and Operating theatres as well as complete Hospital Information solutions.

Our workflow expertise is a culmination of experience obtained globally from some of the world's leading informatics solution providers in the area of RIS (Radiology Information Systems) and PACS (Picture Archiving and Communication Systems).

YOUR LOGICAL CHOICE SYSTEMS INTEGRATION

Tecmed IT/Informatics can also provide HIS (Hospital Information Systems) as well as a locally developed Billing engine to support your entire workflow and clinical process.

Our local technical experience is unmatched at keeping your solutions running effectively, providing the ongoing efficiencies and service support that you have come to expect from a leader in the local Healthcare market.

We are also involved in the supply of:

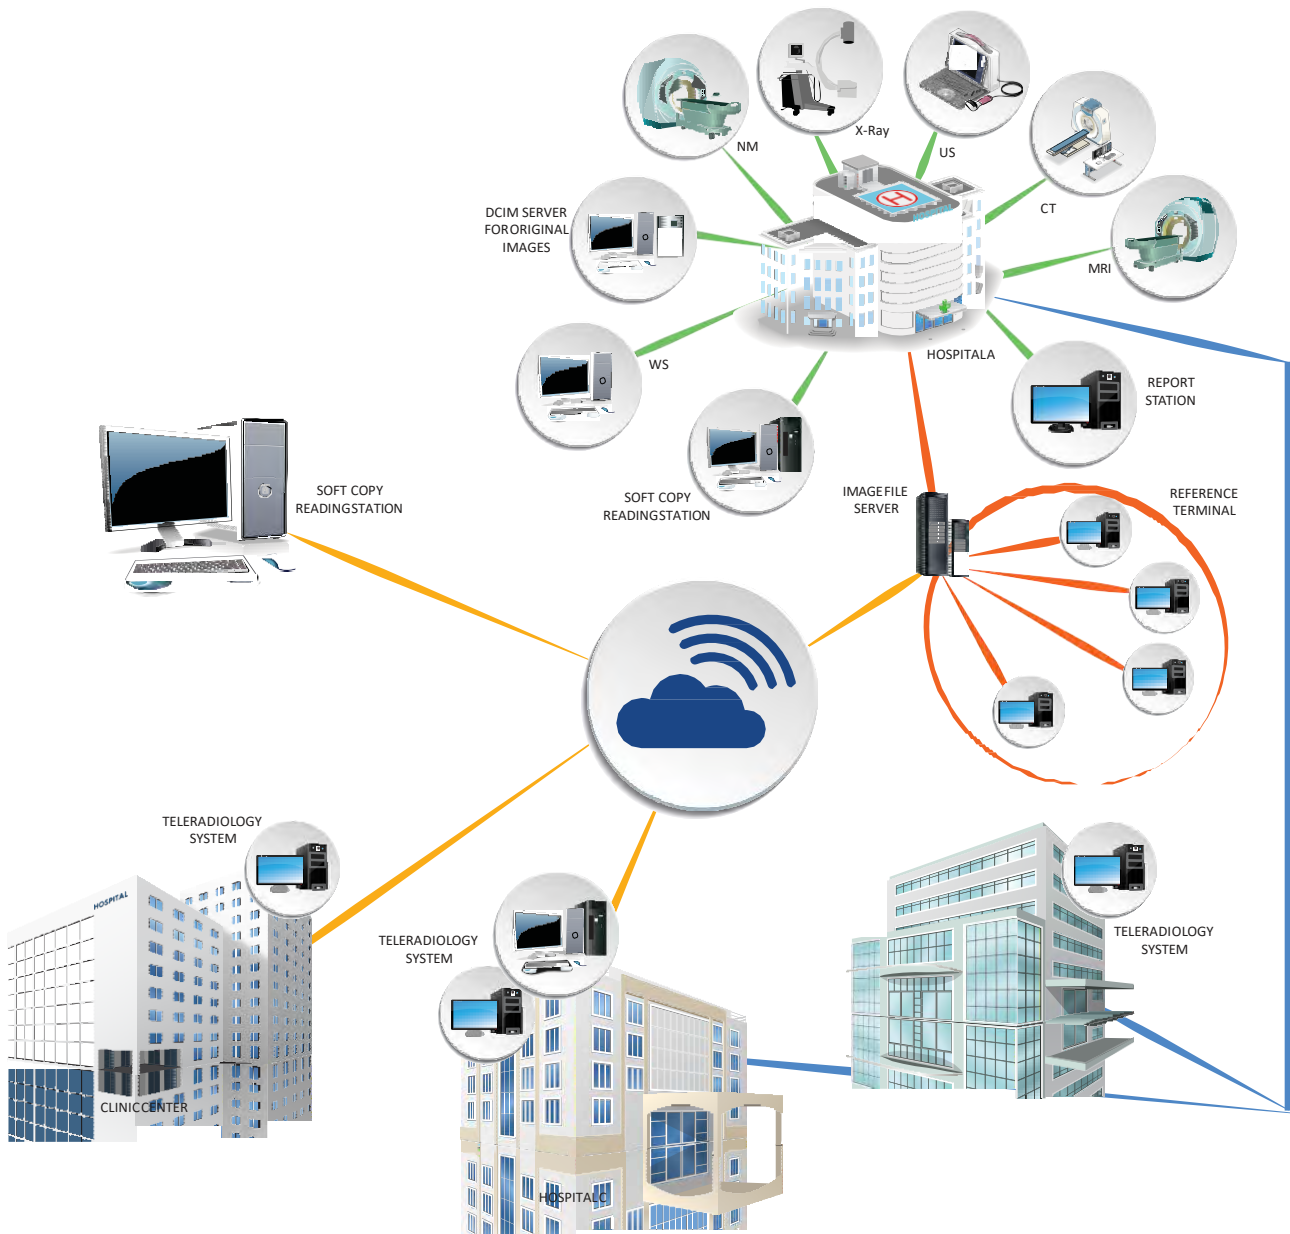

- Network infrastructure;
- IT back-end like e-mail service, storage solutions, domain controllers; cloud;
- CCTV; and
- PA solutions to complete all the digital environments.

Our PACS and RIS solutions are all backed by world leading brands that have a global footprint of thousands of users and include global support personnel who back up our highly skilled technical division, most whom are from clinical backgrounds, provide effective methodology in getting staff trained and operational on the new

solutions, thereby making us leaders in implementation.

Our structured training methods and approach fills our customers with confidence as they know that they will be taken care of during this phase of the project and that there is recourse for ongoing updated training when required.

TECMED AFRICA Informatics will provide you with the solution that best fits your vision and budget. We guarantee a 100% success rate with any of our solutions or customer projects that we undertake.

A "FOUR-PEAT" IN KLAS

The Knowledge to meet expectations. The passion to exceed them.

Why SECTRA PACS, VNA?

- More than 20 years experience as a leading innovator in medical imaging IT.
- More than 1,700 installations worldwide (Radiology, Pathology and Cardiology, with VNA).
- Strong, stable public company founded in Sweden in 1978 with a long history of positive financial and product performance and leading market share.
- High customer-retention rate.
- Wide range of installation experience and migration and integration expertise.
- Experience with a wide range of complex, large-scale solution deployments for regional enterprise healthcare providers, community hospitals, diagnostic imaging centres' and teleradiology providers.
- Unique expertise in the breast imaging area. Sectra installed the first dedicated Breast Imaging PACS in the early 2000s and is now one of the largest suppliers in the market.
- A complete image management system for the orthopaedic surgeon with combined diagnostic and pre-operative planning tools for the fast workflow and an optimal surgical outcome of the patient.

SECTRA

Digital Integrated Operating Theatre Systems

IT/INFORMATICS

Digital imaging has revolutionised the manner in which clinical images are generated, reviewed and distributed within hospital institutions. Coupled to TECMED AFRICA's competence in networking and digital imaging, the Digital Theatre is an additional solution provided for surgical teams. Importation, display and exportation of clinical images, report results as well as full control of all theatre equipment from one remote console ensures that the modern surgeon is provided with every aspect possible to allow him to perform to the full

extent of his capabilities. Additionally, the systems allow surgeons to present their operations to local and international conference rooms as well as access local or international opinion on-line whilst performing the operation. Storage and archiving of all relevant information pertaining to the operation can also be performed. We are one of the only companies that can supply the full range of requirements in a digital OR.
